
Summary

Mechanical Engineering graduate with experience in industrial automation, AGV systems, MES/WMS, and technical support. Skilled in troubleshooting, process optimization, and problem-solving, with a strong analytical mindset and a passion for improving operational efficiency through automation.

Education Qualification

- Master's degree in Mechanical Engineering Modelling 2022-2025
[Budapest University of Technology and Economics \(BME\), Hungary](#)
- Bachelor's degree in Mechanical Engineering 2017-2021
[Aligarh Muslim University, India](#)
- Diploma in Mechanical – Refrigeration & Air - Conditioning 2014-2017
[Aligarh Muslim University, India](#)

Professional Experience

Technical Support Engineer (Automation), [SK on Hungary](#) May 2025- Current

- Supported warehouse operations by ensuring timely material movement and availability to meet production requirements.
- Handled material transport using warehouse equipment and ensured safe movement between designated areas.
- Maintenance and managing equipment health (root cause analysis, troubleshooting)
- Oversee and troubleshoot MES (Manufacturing Execution System) to ensure synchronization between shop floor operations and digital control systems
- Monitored and updated warehouse data in MES/WMS to ensure alignment between physical inventory and system records.
- Collaborated with production, logistics, and quality teams to support smooth warehouse and distribution activities.
- Conducted system testing and verification to ensure accuracy and compliance
- Maintained site documentation and progress reports.

Technical Support Engineer (AGV), [Samsung SDI, Hungary](#) Apr 2024 – Apr 2025

- Led mobile robot projects, ensuring adherence to plans.
- Provided on-site support for AGV and warehouse systems (WMS), resolving issues swiftly.
- Monitored and mitigated on-site technical problems.
- Conducted customer training on technical and operational aspects.
- Managed installation, testing, and issue resolution for products.
- Handling of Q3, Q7 and Roller Conveyor type AGV's.
- Responsible for preparation detail orientated reports.
- Staying informed about emerging developments and technologies

Logistic Trainee, [Hi-Son Locks Pvt. Ltd Aligarh, India](#) Feb 2021-Jan 2022

- Manage automated vehicle operations in warehouse, ensuring efficient raw material transport to production areas.
- Generate reports on system issues, analyze patterns, and recommend improvements to boost AGV uptime.
- Contribute to mobile robot project execution, implementing necessary adjustments to stay on schedule.
- Deliver hands-on technical assistance for AGV deployments, working with teams to troubleshoot and resolve technical challenges.

- Planned and scheduled manufacturing, ensuring timely production.
- Demand Management and Shortage Analysis
- Coordinated logistics and goods Movement

- Hands-on experience with refrigeration and air-conditioning systems
- Assisted in equipment installation (erection), maintenance, and basic troubleshooting of HVAC systems

Projects and Publications

- Mobile Wheelchair Lift Design, [Hungary](#)
- Nitric Oxide Formation in Single Droplet Combustion, [India](#)
- Solid Modeling of Engine Blower (Supercharger), [India](#)
- Material Today: Proceeding, ELSEVIER (Research Paper I), [India](#)
- ADBU-Journal of Engineering Technology (Research Paper II), [India](#)

Skills and Software Packages

- Production & Quality Control: Hands-on experience with CNC, CMM, digital micrometers, vernier calipers
- Software: SQL, MES, WMS, Microsoft Office (Excel), SolidWorks, AutoCAD 2D
- Core Competencies: Quick learner, Analytical skills, Supervising skills, Problem-solving, Team player

Honors and Awards

- | | |
|---|------|
| • Awarded Stipendium Hungaricum Scholarship for Full Time Master's program, Hungary | 2022 |
| • Qassim University Deanship Scholarship, Saudi Arabia | 2023 |

Language

- | | | |
